

Limited Liability Company “UNK”

Address: 361300, Kabardino-Balkaria, Urvanskiy, city of Kakhun, 40 Lenina St.

Letter #7 from March 17, 2012

To: President of Cantat Associates Inc, Alexander B. Zevin

Letter of Feedback

On February 6, 2012, LLC “UNK” performed pothole repair trials in the first 1 KM section of the Nartkala-Kakhun-Pravourvanskiy highway, using the all-weather “Perma-Patch” cold mix asphalt technology and concentrate.

The cold asphalt mix was exceptionally easy to compact (vibratory compaction plate was used). The environment temperature at the time of operations was -15°C.

14 days following the pothole repairs, a sample of Perma-Patch cold mix asphalt was extracted from the pothole for laboratory inspection. The results of the laboratory examinations concluded that the mix was of high quality.

It should be noted, that the Perma-Patch cold mix asphalt technology is much more appropriate for this type of work. Firstly, the labour costs are considerably lower. Secondly, this technology is much easier to implement. Thirdly, the technology can be used in any weather conditions.

I am certain, that this technology will be widely used in the future.

Respectfully,
General Director of LLC “UNK”
Kushkhov K.S.
