To:

Alexander Zevin

President of Cantat Associates Inc.

Dear Alexander!

The “Evotherm J1” additive, supplied by you, yielded excellent results when used in sulphur-containing asphalt mixes. In 2012, we will be using the product in general maintenance operations in projects belonging to “Gazprom” (Astrakhan, Novy Urengoy).

We are planning to use the “Beram 3060 LM” crack sealant in April, during the road pavement crack sealing operations in projects belonging to “Gazprom” and “Voronezh Avtodor”.

Product volumes will be discussed separately.

Respectfully,

A. N. Shubin

General Director

LLC “PromSpecMash”
